

# Device as a service

We offer a service that fixes your ongoing device costs and ensures continuity of care when devices are lost, damaged or become faulty.

Recording care delivered requires a solid, reliable, safe device which enables care workers to do their job effectively and without hindrance. Having a device which can withstand drops, water incidents and infection control measures is important. In addition to this, devices can go missing when they are not in use and being charged.

## Device qualities

- Rugged for everyday use
- Reasonable weight
- A size that fits in a pocket
- A swappable battery that lasts the duration of a shift.
- The ability to be locked down to prevent non-work activities

## Device features

- Manufactured and designed for the healthcare industry
- Rugged IP67 dust and liquid resistant device
- Supported Android Enterprise device with security updates
- NFC for care action tags
- 1.2m drop capable on to vinyl tile over concrete

## Key customer benefits

- Swappable batteries mean that customers only require 1 device for each carer on their largest shift, not 1 device per carer on the largest shift plus second largest. 1:1 carer to device ratio instead of 1:1.8
- GDPR/DSPT/NHS Mail peace of mind compliance – 4 Year device security and support
- Device lockdown, restricting access to settings and applications which would normally distract from care delivery
- Rugged device IP67 Rated - Protection from immersion in water with a depth of 1 meter for 30 minutes and protection from contact with harmful dust
- NFC integration supporting MCM NFC care actions

## Prices

- Your required number of devices
- Your required number of batteries
- Your required number of charge racks
- Your required number of device accessories
- Free rapid replacements for lost, damaged or faulty units– no questions
- Device lock down
- Device refresh to ensure compliance with NHS standards
